Save money and energy this summer

Summer rates are June 1 through Sept. 30. Rates are highest during peak hours, which are from 4 p.m. to 9 p.m., Monday through Friday. All hours on weekends and holidays are off-peak. Here are some tips to help you reduce your energy usage and lower your bill during summer.

- If possible, reduce or avoid running appliances and large equipment during peak hours.
- Consider pre-cooling your space before 4 p.m. and then raising the temperature on your thermostat. The pre-cooling can help your facility stay comfortable throughout the peak period.
- We measure energy usage in 15-minute intervals, so spread out or schedule equipment start times at least 15 minutes apart.
